Q.

How do you code failed gastric band with vomiting and no weight loss?

A.

We are not able to provide an answer to this query. Documentation such as this should be queried with the treating clinician. Clarification is required to determine if the symptom/condition is related to the device. It does not need to be documented as causal but there needs to be an association.

Refer to ACS *1904 Procedural Complications* page 254, "…when the complication relates to a prosthetic device, implant or graft, look up the main term 'complication' and then by the device…"

Refer also to 8.7 Haemorrhage due to or associated with prosthetic devices, implants and grafts WA Coding Committee decision date: 11/07/12.

DECISION

Each case should be queried with the treating clinician for further clarification to determine if the symptom/condition is related to the device.

[Effective 23 Jan 2013, ICD-10-AM/ACHI/ASC 7th Ed.]
